

XY Scanner status

- **Current status:**

- ✓ 23/27 telescopes measured at least once
- ✓ Light source calibration in Karlsruhe, Wuppertal
- ✓ **4.4%** uncertainty on absolute FD calib

- **Open questions**

- Effect of mirror cleaning on calib constants → see **Calibration session**
- Revisit reproducibility – claimed 1% too optimistic for some eyes?

- **Further plans**

- × LL mirrors 1, 2, 5, 6 in November 2024
- × Add XY calib constants to database
- × Calib. of light source at multiple sites
- × Transition strategy between XY and Drum
